## PRODUCTION SCHEDULE

All Eya Organik tastes are produced from seasonal and fresh fruits. Therefore, each product can be produced in different and specific periods. Although we try to meet your demands from our existing stocks throughout the year, we may not always be able to meet the desired demand for every product for your wholesale orders. For this reason, we aim to determine your pre-requests for your wholesale orders before production by sharing our production calendar on a product basis. In this way, the production quantities you want can be approved and your special requests, if any, can be evaluated with the meetings to be held before the production. We would like to remind you that we are a producer, not a supplier. Thank you for choosing Eya Organik.
